WORK EXPERIENCE

Senior Software Engineer

Kellton Tech

08/2025 - 06/2026

Service Based Organisation

Gurgaon

Achievements/Tasks

- Developed a Survey Application using FastAPI and MongoDB, delivering scalable backend solutions tailored to client requirements.
- Contributed to the Continental Project as a Python Backend Engineer, leveraging Flask, PostgreSQL, and Azure to enhance enterprise workflows.
- Developed an agentic system using Streamlit, Langgraph, and an agentic RAG pipeline to streamline database interactions. Integrated natural language query translation into SQLite for seamless data access, while incorporating Google Gemini Flash API to enable multimodal understanding of images and videos for intelligent query responses.

System Engineer

TCS - Tata Consultancy Services

04/2021 - 07/2025

Achievements/Tasks

Noida

- Designed and enhanced a FastAPI-based QuickSearch Application for AstraZeneca, enabling multilingual search (Katakana, Hiragana) and role-based access control.
- Automated regression testing for the JJAR application (Johnson & Johnson), reducing manual effort and improving deployment reliability.
- Delivered L2/L3 support for SaaS applications in the Life Sciences domain, resolving critical incidents and improving system uptime. Mentored 7+ team members to strengthen overall team capability.

Support Engineer (Python/JavaScript)

Meddiff Technologies (Acquired By Ramsoft)

01/2020 - 01/2021

Achievements/Tasks

Bangalore

- Installed, configured, and supported SaaS-based PACS systems across hospital networks, ensuring high availability and performance.
- Collaborated with cross-functional teams to troubleshoot complex technical issues, minimizing downtime and improving customer satisfaction.
- Authored technical documentation and conducted client training sessions to drive product adoption and effective usage.

EDUCATION

Bachelor of Technology | Computer Science

Meerut Institute of Technology, Affiliated By Uttar Pradesh Technical University

08/2016 - 09/2020

72.3%

TECHNICAL SKILLS

Python

PROJECTS

Continental Sales Data Application

(11/2025 - 01/2026)

Used Python-Flask, Postgres, Azure.

- Developed new functionality to restrict uploads to specific file types and validated date fields for improved data integrity.
- Enabled users to export sales data in multiple formats (XLSX, CSV) and introduced new tabs for year-over-year sales comparisons.

Survey App (Onsite - Client Location)

(08/2025 - 11/2025)

Used Python-FastAPI, MongoDB, Postgres, Azure.

- Implemented logic modules to dynamically control question flow based on user responses, enhancing survey personalization.
- Built insights functionality allowing users to analyze selected questions and compare responses across target groups.
- Designed a versioning system enabling survey administrators to create, save, and compare multiple survey versions with thousands of questions. Integrated OpenAPI to streamline version comparisons and publishing workflows.
